

LAKSHYA YADAV

Senior Frontend Developer | Frontend Lead | React.js · Next.js · JavaScript | Web Performance & Architecture

Thane, Maharashtra, India | +91-9929209856 | itslakshyayadav@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of experience building and leading production-grade web applications in React.js, Next.js, and JavaScript for BFSI, SaaS, and consumer platforms. Proven track record of owning end-to-end digital journeys (loan onboarding, EMI payments, KYC integrations) from architecture through delivery, integrating secure third-party services, and improving conversion and performance. Increasingly focused on applying AI-assisted development practices and integrating LLM-powered features into production frontends. Comfortable driving technical decisions, collaborating cross-functionally with product and backend teams, and mentoring engineers, with hands-on ownership of feature delivery equivalent to a lead-level scope.

CORE SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, HTML5, CSS3, TailwindCSS, Bootstrap

State & Data: Redux Toolkit, Context API, GraphQL, REST APIs, Axios/Fetch, WebSocket

AI & LLM Technologies: LLM API Integration (OpenAI, Anthropic Claude), Vercel AI SDK, Prompt Engineering, AI Agents & Agentic Workflows, RAG / Vector Search Fundamentals, AI-Assisted Development

AI-Assisted Dev Tools: Claude Code, GitHub Copilot, Cursor

Engineering Practices: Web Performance Optimization, Responsive & Component-Based Architecture, Git/GitHub, Bitbucket, Postman, Agile/Scrum, Cross-Functional Team Collaboration

PROFESSIONAL EXPERIENCE

Frontend Developer — Mahindra & Mahindra Financial Services Ltd. (Mahindra Finance)

Sep 2025 – Present

Leading NBFC in India (rural/semi-urban financing, 10M+ customers, USD 11B+ AUM, 1,300+ offices)

- Designed and delivered a Quick-Pay EMI repayment flow, reducing the payment journey to 3 steps and improving payment completion rate and overall user experience.
- Owned the end-to-end Personal Loan digital journey covering application through disbursal, integrating DigiLocker KYC, Underwriter Flow, Account Aggregator (AA), Penny Drop verification, and e-Sign Agreement to deliver a secure, paperless onboarding process.
- Explored and prototyped an AI-assisted document review step for KYC verification, using LLM-based extraction to pre-fill applicant data and reduce manual data entry.
- Partnered with backend, compliance, and product teams to define technical requirements for high-stakes financial workflows.

Technologies: HTML5, CSS3, React.js, JavaScript, TypeScript, TailwindCSS, Bitbucket

Frontend Developer — Pulsepro.ai (PULSE)

May 2024 – Aug 2025

Construction-site monitoring platform using digitized checklists for safety and quality compliance

- Built the region hierarchy structure powering multi-level organizational reporting.
- Implemented the mystery shopper module and a QR-code-based complaint management system.
- Designed and established permission sets and notification sets, and delivered the complete complaint management status workflow.

Technologies: HTML5, CSS3, React.js, JavaScript, Bootstrap, GitHub

Frontend Developer — Fyndster

Mar 2022 – May 2024

Smart digital contact book platform (fyndster.com) with cloud backup and unique digital cards

- Built card verification features on the admin portal (admin.fyndster.com).
- Developed the Reserve CID feature and led QA across the main Fyndster web application and mobile app.

Technologies: HTML5, CSS3, React.js, JavaScript, TailwindCSS

Frontend Developer Intern — Just Vegan (via Fyndster)

Internship

Online store for vegan food products (justvegan.fit)

- Built the entire frontend from scratch in React.js, including Dishes, Admin, My Account, and Checkout modules.

- Implemented HTML/CSS with TailwindCSS from design mockups.

Technologies: React.js, HTML5, CSS3, TailwindCSS, Web APIs

SELECTED PROJECTS

Open Retro (openretro.in) — Personal Project

- Built a free retrospective and scrum poker tool with real-time boards for team retrospectives and Fibonacci-based story-point voting.
- Implemented Firebase for backend and real-time data sync, plus QR code/email board sharing.

Technologies: React.js, HTML5, CSS3, TailwindCSS, Playwright, Firebase, Google Analytics, SEO

News App — Personal Project

- Built a news aggregation app covering Finance, Sports, Movies, Science, and Technology categories using the newsapi.org API.

Technologies: React.js, HTML5, CSS3, TailwindCSS, Web APIs

FastFood Management System — College Project

- Built a responsive restaurant billing dashboard with admin-managed menu items and real-time price updates.

Technologies: VB.NET, HTML5, CSS3, MS Access

EDUCATION

Bachelor of Computer Applications (BCA) — Career Point University, Kota — 70%

Higher Secondary Education — Saroj Devi Public School, Borkhera, Kota, Rajasthan — 90%

LANGUAGES

English (Proficient), Hindi (Proficient)
